

## **WITH A NEW LOOK: ASIA POWER WEBSITE REVAMP**

**Asia Power** is pleased to launch its revamped website on 23 April 2004. The move reflects the management's continued effort to enhance its investor relations function to better interact with the investors, individual and institutional alike, and other participants of the investment community to strive for the full, fair and transparent disclosure of corporate information. Enhanced sections of the website include Corporate Information, Investor Relations, News & Publications and Business Units. A few user-friendly features such as a search engine were also added to facilitate quick accesses to company information.
